

# CLUBS

## CLUBS

The content and essence of the "Elemento" club, which is conducted with the participation of 16 undergraduate students at the "Engineering graphics and design theory" department.

The plan of the topics of training conducted in the science club was reviewed by the members of the department and accepted with additions.

Based on the set plan, each teacher made a list of talented and interested students in the groups he was teaching and worked with them.

In September, work was carried out to identify talented and interested students in the groups taught by the department and attract them to the circle, and 2 or 3 students were assigned to each teacher. By January, topics were assigned to each of the students based on the plan. The students regularly showed the work they had prepared on the topic to the teacher assigned to them, corrected the mistakes and made a presentation in the beginning of February in their groups with the participation of several teachers. The students who were able to explain the topics in an interesting way were selected, the task of preparing an article for the scientific-practical conference was given, and the teacher of the students was appointed to be responsible for this.

The person responsible for the circle: A.E. Urishev, for inquiries, phone: 93 572-50-69

The class is held every Monday and Tuesday from 8:30 a.m. to 12:50 p.m. in room B-408.
