

Master's

- | | | |
|---|---|--|
| 1 | 70730901 -
"Hydrotechnical facilities (in water industry)" | 70730901-Hydrotechnical constructions master's degree students get knowledge on: educational and educational process, development of project search and project estimate documents, improvement of hydraulic constructions, scientific-research works. |
| 2 | 70812801 -
"Construction and use of hydroelectric power stations" | 70812801-HES graduates receive knowledge on the construction and use of , hydroelectric power stations, research and design processes, education and training process, project search and project estimate documents. |
| 3 | 70812501 - "Use of hydraulic facilities, their reliability and safety" | 70812501-Usage of hydrotechnical structures, their reliability and safety master's degree students will learn about: educational and training process, project search and development of project estimate documents, process of using hydraulic structures, reliability assessment of hydrotechnical structures, control of safety. |
| 4 | 70812502 -
"Operation and diagnosis of pumping stations and devices" | 70812502-Usage and diagnosis of pumping stations , master's degree majors receive knowledge on the objects of their professional activity: educational and training process, project search and project estimate documents, pumping stations and devices, scientific research and design processes. |
| 5 | 70730904 -
"Organization and technology of construction of hydraulic facilities" | 70730904-Organization and technology of the construction of hydraulic structures master's degree students: conducting scientific research activities in production associations, on the organization and technology of the construction of hydraulic structures in the entities of basin departments, irrigation system departments, water construction and irrigation trusts, industrial and business organizations they will learn about the means, methods, methods and methods of human activity aimed at solving complex problems, organizing work in the development of architecture - construction industries and sectors, defining the perspective, professional knowledge, and the ability of authority. |
| 6 | 70111202 -
"Engineering graphics and design theory" | 70111202-Engineering graphics and design theory graduate students: teaching subjects related to the specialty in all educational organizations; they will get knowledge on carrying out scientific research activities, carrying out scientific research works in network research institutes, centers, scientific production associations, designing and managing the process in network departments and institutions. |
