

## RESEARCHERS

No	Researchers	Scientific degree, job position	The name and the speciality code number	Subject of the dissertation
1	Kahharov U.A.	Post doctoral student	05.09.06.-Hydrotechnical and meliorative construction	Regularity of duplex symmetric restraint of stream
2	Khasanov Khojiakbar	Researcher	05.09.06.- Hydrotechnical and meliorative construction	Improving methods for calculating the water reservoir area and volume using geoinformation technologies and remote sensing
3	Babajanova Nodira	Researcher	05.09.06.- Hydrotechnical and meliorative construction	The influence of siltation of a river reservoir on the conditions of reliable operation of waterworks facilities (on the example of the Tuyamuyunsky waterworks)
4	Djabbarova Shaxnoza Akramjonovna	Researcher	05.09.06.- Hydrotechnical and meliorative construction	Influence of throughput capacity of culverts on the intensity of unsteady filtration in soil dams
5	Jaxonov Aziz Abduljalil ugli	PhD student	05.09.06.- Hydrotechnical and meliorative construction	Patterns of spreading of a stream constrained by transverse dams on rivers with asymmetric floodplains.
6	Panjiev Sherzod Soxibovich	Researcher	05.09.06.- Hydrotechnical and meliorative construction	Improvement of technologies for cleaning flood reservoirs from muddy sediments
7	Kurbanov Shaydobek Shuxratovich	Researcher	05.09.06.- Hydrotechnical and meliorative construction	Scientific justification of the size and granulometric composition of stone linings of transverse embankments
